Profile Summary

I am a well-rounded engineer with a product-minded approach and strong full-stack skills. I specialize in building modern web applications using React, Next.js, TypeScript, and Node.js. I bring a sharp focus on user experience, clean architecture, and scalable features. I am highly adaptable, quick to learn, and always bring value to the teams I join. I approach every task with enthusiasm and attention to detail.

Work Experience

Plabosce — Software Developer

Remote | Mar 2025 – May 2025

Tools: Next.js, TypeScript, Supabase, Stripe, Framer Motion, Recharts, Headless UI, Tailwind, Context

- I contributed to building Plabosce a modern, responsive web application.
- I implemented key user interfaces including the dashboard, settings page, stations page and reusable UI components.
- I integrated Stripe for secure one-time payments, including a coupon system, and developed a custom webhook to track user subscriptions.
- I created backend APIs to manage user data and track subscription status securely.

JobKitt — Software Developer

Remote | Nov 2024 – Feb 2025

Tools: Next.js (Full Stack), TypeScript, Tailwind CSS, Firebase, React DnD, Context (state management), quill.js

- I contributed to building an AI-powered resume and cover letter platform tailored for job seekers.
- I developed the core resume builder, including dedicated field form sections, custom templates, section modularity, and a rich text editor.
- I implemented a dedicated formatting toolbar for font size, line height, font style, and template switching.
- I helped build and maintain a global ResumeBuilderContext to manage resume data and interactions across the app.
- I collaborated on the landing page, fixed bugs, and tested the app across different devices to ensure a smooth UX.

Freelance – Client Project — Software Developer (Self-Employed)

Remote | Apr 2024 – Nov 2024

Tools: Next.js, Node.js, Express.js, MongoDB, Tailwind CSS, Clouinary, Nodemailer, React Hook Form, redux

- I developed a full-stack platform to connect companies with fractional professionals, featuring secure user authentication and protected dashboards (admin and user dashboards).
- I implemented job posting, job board, application tracking, and admin management for users, companies, and listings.
- I built a notification system and integrated third-party tools such as Calendly (for scheduling), Clouinary (for media), and Nodemailer (for email communication) for enhanced functionality.

- I integrated dynamic content modules including blog, FAQs, and success stories, with dynamic rendering and admin control.
- I developed secure RESTful APIs using Node.js and Express, with MongoDB for data storage and ensured strong security.

Hitec City Technologies — Frontend Developer

Lagos, Nigeria | Jan 2023 – Jun 2023

- Built responsive pages for the “Lenders NG” website.
- Ensured cross-device functionality and clean design.
- Participated in Agile workflows and reviewed team code for quality.

Education

University of Lagos

Bachelor of Engineering in Civil & Environmental Engineering

Jan 2016 – Sept 2023

Women Techsters Fellowship – Tech4Dev

Software Development (Frontend)

Aug 2022 – Mar 2023

- **Backend Technologies:** Node.js, Express.js, MongoDB
- **Version Control:** Git, Github
- **Hosting Platforms:** Netlify, Heroku, Vercel, Render.
- **IDEs:** Visual Studio Code, Atom
- **Design Software:** Figma, Figjam
- **Microsoft Office Software:** Microsoft Word, Excel, PowerPoint
- **Collaboration Tools:** Notion, Slack
- **Package Managers:** npm, yarn

Projects

★ TalentNest – <https://talent-nest.vercel.app>

A full-stack web application that connects freelance talent to global job opportunities, featuring separate dashboards for talents and companies. It's built with Next.js, TypeScript, Tailwind CSS, Node.js, Express, MongoDB, React Redux, Framer Motion, and Nodemailer, and is hosted on Vercel and Render.

★ TalentNest-Admin - <https://talent-nest-admin.vercel.app>

A dedicated Admin dashboard for managing companies, talents, job posts, talent nest connect, scheduling interviews and AI-powered resume matching system as a hiring tool.

★ QuickPay Landing Page – <https://quick-pay-beta.vercel.app>

An animated landing page designed to engage users with a clean, modern aesthetic.

★ FastKar – <https://fast-kar.vercel.app>

A simple web app for booking rides, including account authentication and real-time interface updates.

★ Planet Protectors – <https://planetprotectors.netlify.app/home>

A project promoting environmental education and awareness.
